**DETAILED ACTION**

***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because it contains the implied phrase "disclosed herein." Correction is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 31 is rejected under 35 U.S.C. 102(b) as being anticipated by Tomiyama et al. US 5,665,491.

Tomiyama '491 discloses a process for making an electrode battery comprising preparing a powder material (Example 1), which intercalates and deintercalates a lithium ion and contains an oxygen element, a sulfur element, and a transition metal element (abstract, column 15, and Examples), and molding into a structure (Example 1 and Figure).

#### ***Allowable Subject Matter***

Claims 10-29 and 32 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or suggest the claimed steps of heating the specifically claimed compounds (a)-(d) in closed vessel, in the claimed order, in the process for preparing a powder material of a compound which electrochemically intercalates and deintercalates a lithium ion and contains at least an oxygen element, a sulfur element, and at least one transition metal element of the instant claim 10.
